Nations with a reason to travel

Regional layouts, scale, terrain identity, and play-space direction

The core map style is set. This brief turns the world plan into distinct, inhabited places for exploration, story, stealth, and combat. The tone draws on industrial alchemy fantasy and military rail networks while keeping Rensei's nations, landmarks, and layouts original.

LOCKED ANCHOR

Lindenmoor's finished village keeps its current Studio coordinates on the 2,048 x 2,048 x 16-stud baseplate.

SEPARATE PLACES

Each other nation is its own teleport place. The diagram shows how travel and story routes relate, not a single seamless terrain mesh.

LIVING REGIONS

A trainer court is one landmark inside a nation. Settlement, work, trade, secrets, and points of interest fill the rest.

Proportional footprints

Separate teleport places sized against Lindenmoor's 2,048 x 2,048-stud horizontal footprint.

PLACE	HORIZONTAL FOOTPRINT	AREA	ROLE	TERRAIN IDENTITY
Lindenmoor	2,048 x 2,048 studs	**100%**	existing village + expansion	Cypress greens
Central City	2,560 x 2,560 studs	**156%**	capital districts + undercity	Civic stone
Foundry Yard	1,536 x 1,536 studs	**56%**	dense rail / foundry town	Soot
Ishval	2,048 x 2,048 studs	**100%**	ruins + caves + ancient sites	Sandy orange
Aerugo Borderlands	2,560 x 2,048 studs	**125%**	vineyard frontier + skirmish line	Warm ochre
Northern Wall	1,536 x 2,048 studs	**75%**	frozen pass + outpost	Snow and ice blue
Corrupted Lands	3,072 x 2,560 studs	**188%**	late-game faction / event region	Ash

Areas are rounded to the nearest whole percent. Only Lindenmoor has a confirmed 16-stud baseplate depth; do not assume the same depth elsewhere.

WORLD + BUILD CONSTRAINTS

1. Keep the approved main-map visual style. 2. Leave Lindenmoor's finished village at current Studio coordinates and expand around it. 3. Build the other regions as their own teleport places, sized and composed as distinct nations. 4. Use an original FMA-inspired industrial alchemy-fantasy tone: rail, state power, military infrastructure, lived-in towns, and ancient architecture.

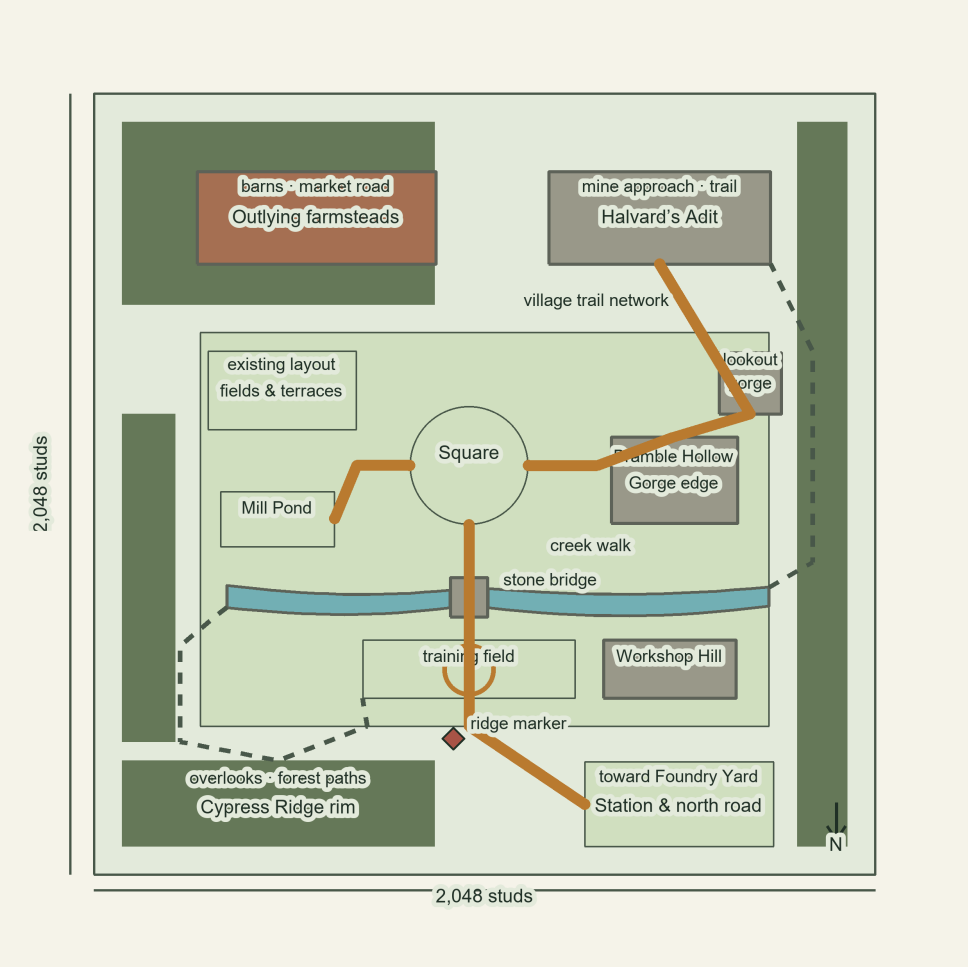

GAMEPLAY + IMMERSION TARGETS

Heat should have room to change the feel of watched streets and contested fronts. Rumors and investigations should grow from residents, records, trade, and old sites. Stealth should use rooftops, alleys, tunnels, caves, ravines, and cover. Movement and combat should read through vaults, climbs, ledges, wall-runs, swim routes, vertical lanes, cover, flanks, and clear objectives. Design each place for life beyond training.

Lindenmoor

2,048 x 2,048 studs | 100% of Lindenmoor's area | separate teleport place

REGIONAL TERRAIN PALETTE Cypress greens, creek teal, field gold

LAYOUT SCHEMATIC | NOT FINAL STUDIO COORDINATES public route quiet route

DESIGN DIRECTION

PLACE CHARACTER

A lived-in farming valley with the finished village as its anchor. Expand the land around the existing square and keep the village at its current Studio coordinates.

LANDMARKS

Square, Mill Creek and bridge, Mill Pond, Workshop Hill, station, wheat terraces, Cypress Ridge, gorge edge, Bramble Hollow, and Halvard's Adit.

MOVEMENT + COMBAT

Preserve the learning sequence: cross the square, vault field walls, climb terrace steps, wall-run the barn alley, ledge-walk the gorge, swim the pond, then enter Bramble Hollow. Keep routes connected around the village.

LIVING WORLD + SYSTEMS

Farm work, station arrivals, market traffic, creek crossings, and mine access make the valley active between fights. Ridge markers and the Adit support optional clues; woods and gorge edges offer quiet approaches.

BLENDER INTENT

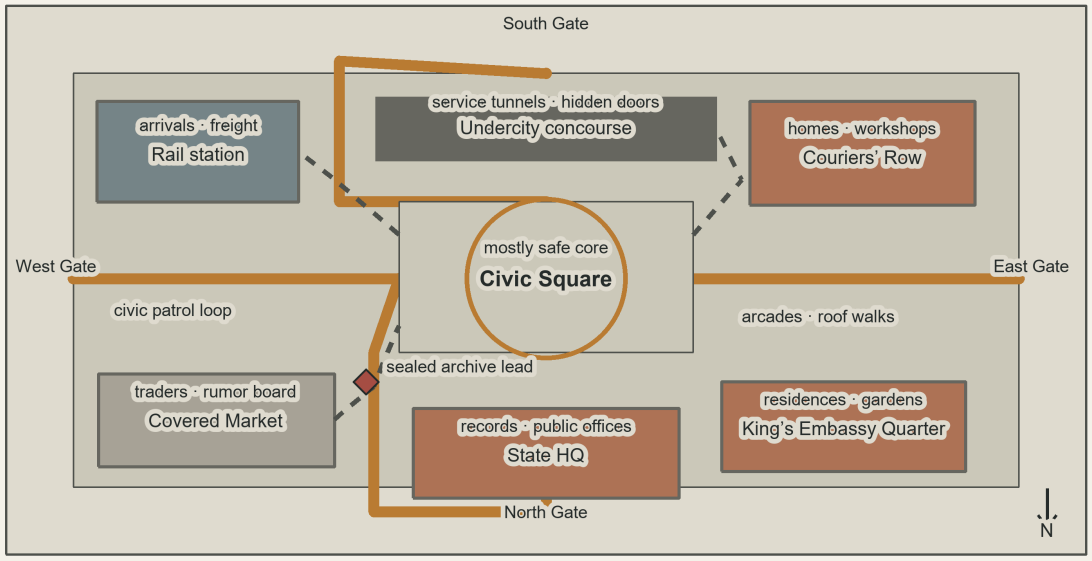

Treat this as a full 2,048 x 2,048 x 16-stud place. Preserve the existing layout and coordinates; use the free baseplate area for connected trails, fields, landmarks, and readable routes.

DISTINCT NATION | BUILT FOR EXPLORATION + PLAY

Central City

2,560 x 2,560 studs | 156% of Lindenmoor's area | separate teleport place

REGIONAL TERRAIN PALETTE Civic stone, aged brick, slate, restrained green

LAYOUT SCHEMATIC | NOT FINAL STUDIO COORDINATES public route quiet route

DESIGN DIRECTION

PLACE CHARACTER

A large, mostly safe political and commercial capital. Keep its civic square welcoming while its districts carry investigation, rumor, stealth, and heat-driven tension.

LANDMARKS

Four gates; State HQ and records offices; King's Embassy Quarter; covered market; rail station; Couriers' Row; civic square; arcades and rooftops; undercity concourse.

MOVEMENT + COMBAT

Build a legible public patrol loop through broad streets and arcades. Rooftop walks, alleys, service doors, and undercity links create quieter observation and escape routes. Preserve the safe civic core as a clear place to regroup.

LIVING WORLD + SYSTEMS

Civic clerks, couriers, traders, commuters, and residents create rumor and investigation leads. Heat can change the feel of watched streets and gated institutions without making every block a combat arena.

BLENDER INTENT

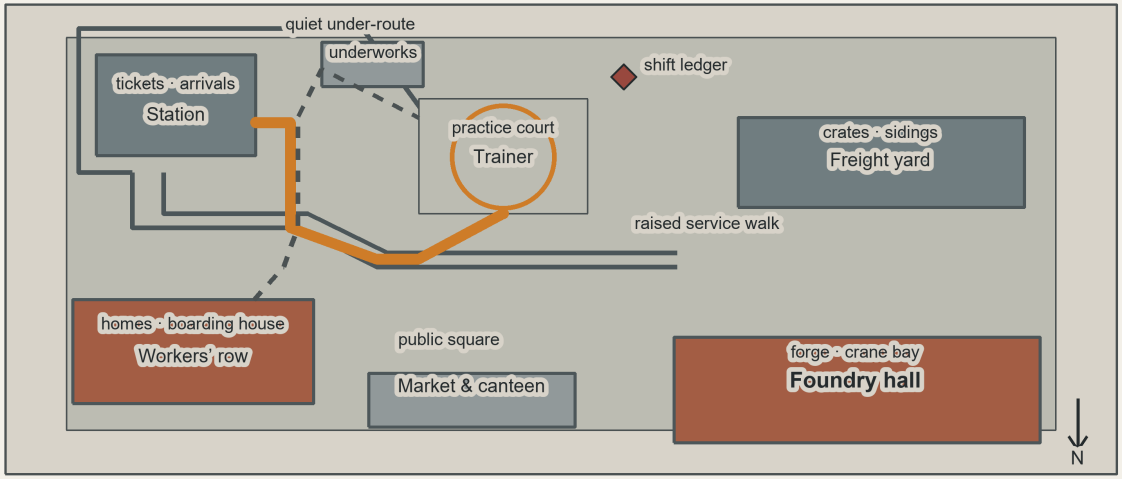

At 156% of Lindenmoor's area, give the capital real district depth. Use civic stone and aged brick, varied rooflines, public signage, covered walkways, and a believable service network.

DISTINCT NATION | BUILT FOR EXPLORATION + PLAY

Foundry Yard

1,536 x 1,536 studs | 56% of Lindenmoor's area | separate teleport place

REGIONAL TERRAIN PALETTE Soot, iron, furnace brick, ember accents

LAYOUT SCHEMATIC | NOT FINAL STUDIO COORDINATES public route quiet route

DESIGN DIRECTION

PLACE CHARACTER

A compact rail junction town that stays busy through trains, shifts, freight, meals, and worker life. The trainer court is one public landmark among many.

LANDMARKS

Foundry hall and crane bay, station, workers' row, market and canteen, freight sidings, trainer court, raised service walk, underworks, and a shift ledger clue.

MOVEMENT + COMBAT

Use stacked rail walks and crane frames for vertical reads; freight crates and machinery break sightlines. Loud metal paths contrast with a quieter under-route and service alleys for flanks.

LIVING WORLD + SYSTEMS

Shift changes, arrivals, canteen queues, freight handling, and boarding houses make the town feel occupied. Rumors and records can surface through workers and the shift ledger.

BLENDER INTENT

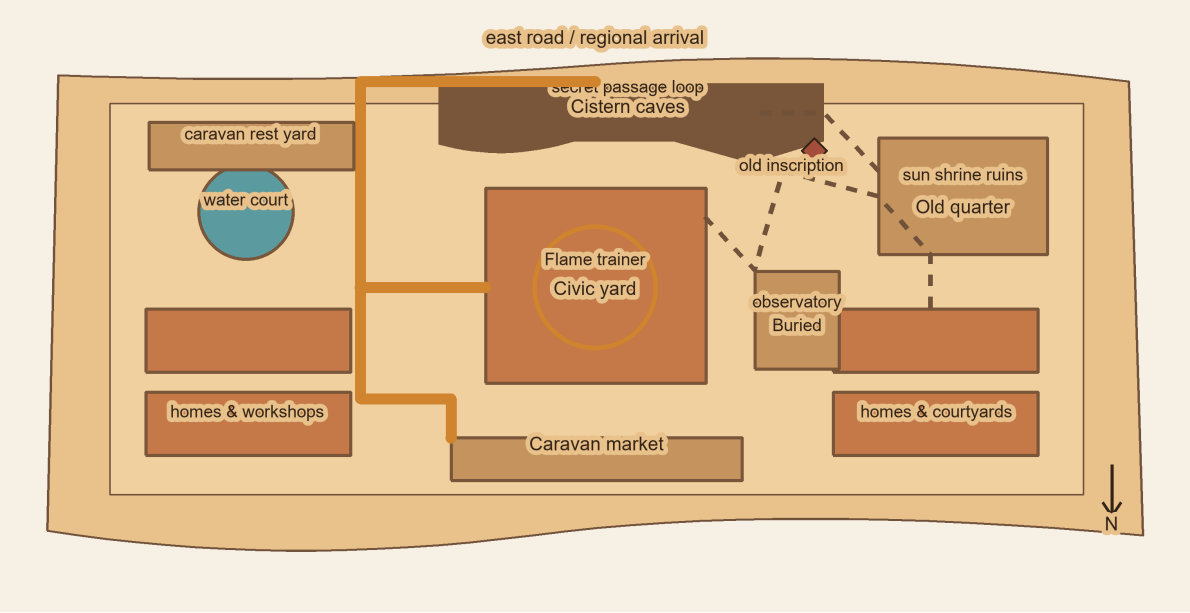

The 56% footprint should feel dense, layered, and efficient rather than empty. Frame sightlines with ironwork, brick, smokestacks, freight, and warm furnace glow.

DISTINCT NATION | BUILT FOR EXPLORATION + PLAY

Ishval

2,048 x 2,048 studs | 100% of Lindenmoor's area | separate teleport place

REGIONAL TERRAIN PALETTE Sandy orange, ochre, sun-baked clay, oasis teal

LAYOUT SCHEMATIC | NOT FINAL STUDIO COORDINATES public route quiet route

DESIGN DIRECTION

PLACE CHARACTER

A living desert nation, not an empty sand arena: caravan families and water courts sustain daily life beside a vast ruin quarter and buried ancient sites.

LANDMARKS

Caravan market, homes and workshops, water court, civic yard and Flame trainer, old quarter, sun shrine ruins, buried observatory, cistern caves, and a secret passage loop.

MOVEMENT + COMBAT

Use open courtyards for readable fights, then contrast them with broken rooflines, low walls, cave drops, and tunnel loops for stealth and flanking. Link the surface ruins to the cistern system and observatory.

LIVING WORLD + SYSTEMS

Caravan rest yards, repairs, water access, trade, and household courtyards give the region a working rhythm. Inscriptions and buried routes support investigations; water is a strong navigational landmark.

BLENDER INTENT

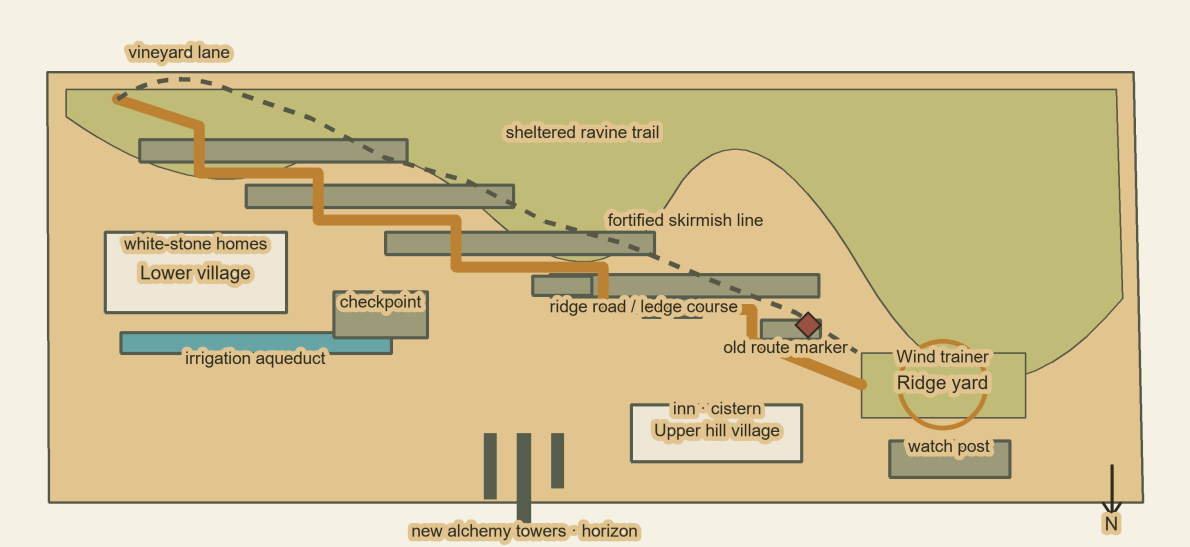

Make sandy orange and ochre the dominant ground read, with sandstone and clay structures, dusty olive shade, and clear teal water accents. Use heat, erosion, and deep shadow to distinguish old sites.

DISTINCT NATION | BUILT FOR EXPLORATION + PLAY

Aerugo Borderlands

2,560 x 2,048 studs | 125% of Lindenmoor's area | separate teleport place

REGIONAL TERRAIN PALETTE Warm ochre, vineyard green, white hill stone, irrigation teal

LAYOUT SCHEMATIC | NOT FINAL STUDIO COORDINATES public route quiet route

DESIGN DIRECTION

PLACE CHARACTER

A warm border nation with productive hills, white village architecture, and a defended frontier. Everyday agriculture and border logistics share the landscape.

LANDMARKS

Lower and upper hill villages, inn and cistern, vineyard terraces, irrigation aqueduct, checkpoint, fortified skirmish line, Wind trainer ridge yard, watch post, and distant alchemy towers.

MOVEMENT + COMBAT

Terrace steps, vineyard lanes, aqueduct crossings, ridge road, and ledge course make elevation matter. Keep a public switchback visible, with a sheltered ravine trail for a quieter flank toward the skirmish line.

LIVING WORLD + SYSTEMS

Vineyard crews, village services, irrigation work, checkpoint patrols, and supply traffic make the border feel inhabited. Alchemy towers remain a long-distance horizon landmark, not a nearby arena prop.

BLENDER INTENT

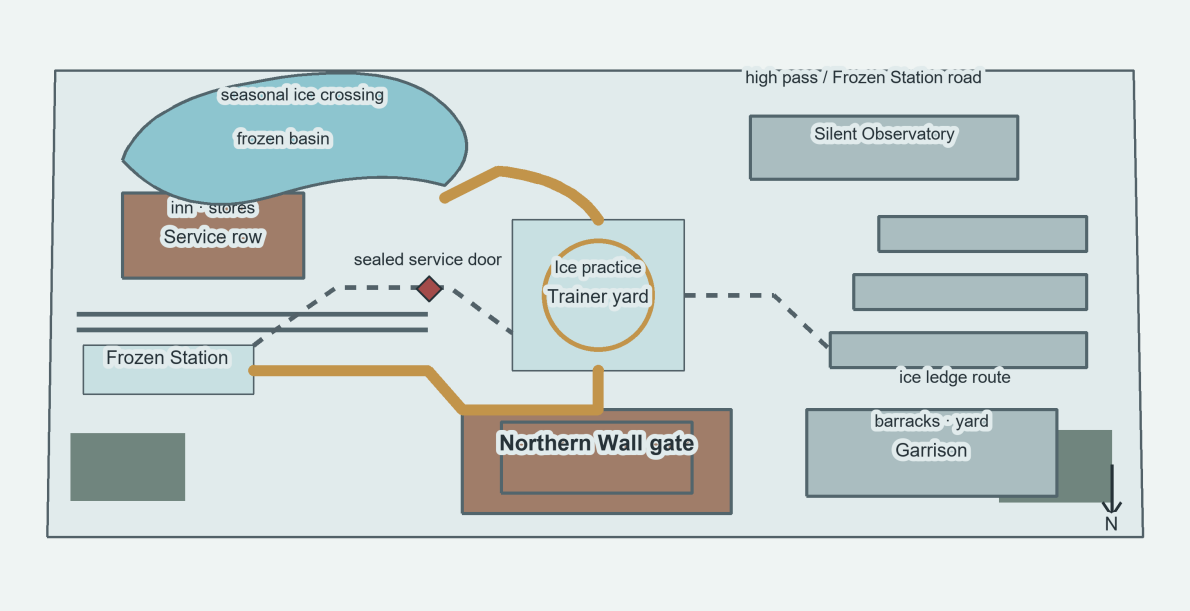

Use sun-warmed ochre earth and crop greens, bright white hill villages, and cool irrigation water. Shape long sightlines to towers against hills, then break them with terraces, walls, and ravines.

DISTINCT NATION | BUILT FOR EXPLORATION + PLAY

Northern Wall

1,536 x 2,048 studs | 75% of Lindenmoor's area | separate teleport place

REGIONAL TERRAIN PALETTE Snow and ice blue, cold stone, deep pine

LAYOUT SCHEMATIC | NOT FINAL STUDIO COORDINATES public route quiet route

DESIGN DIRECTION

PLACE CHARACTER

A working frozen outpost linking civilian services, military presence, research, and the pass through the Northern Wall.

LANDMARKS

Wall gate, Frozen Station, service row and stores, garrison and barracks yard, frozen basin, Ice trainer yard, Silent Observatory, sealed service door, and high pass.

MOVEMENT + COMBAT

Keep the long pass readable as one journey. Ice ledges and a seasonal crossing are risky shortcuts; tunnels, wall sections, supply sheds, and rock shelves create protected combat lanes.

LIVING WORLD + SYSTEMS

Station crews, innkeepers, supply runners, garrison patrols, and observatory staff give the frontier a daily pulse. Weather and ice reshape route choice; sealed doors and observation records seed investigations.

BLENDER INTENT

Read as pale snow and blue ice against cold stone and dark pine. Use warm windows, signal lamps, and restrained military markings to give scale and human presence.

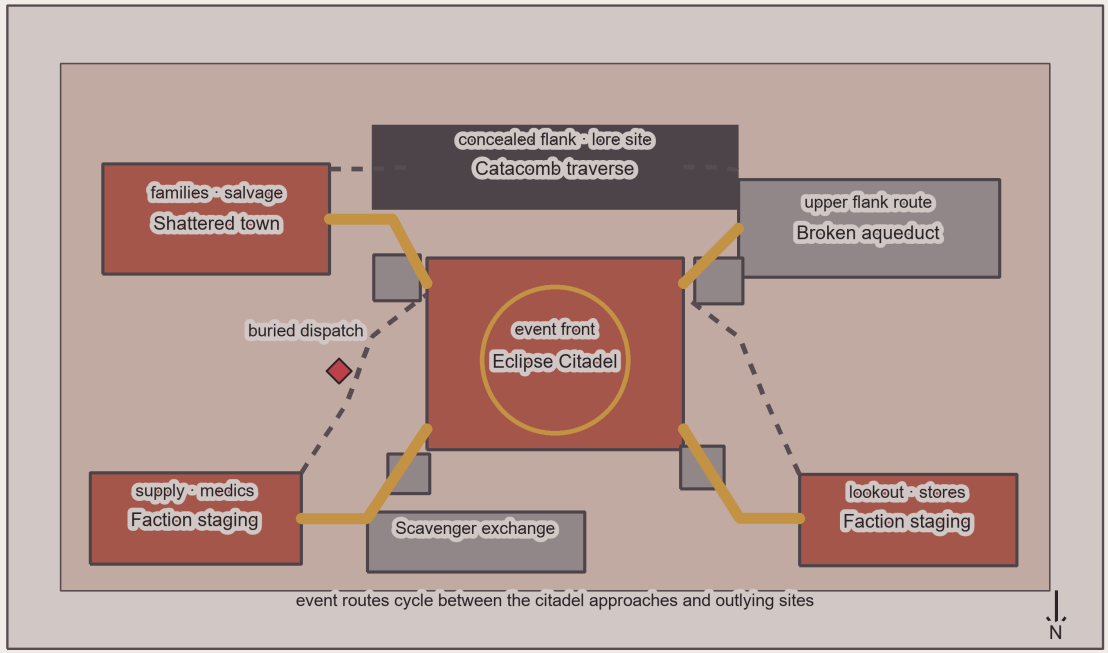

DISTINCT NATION | BUILT FOR EXPLORATION + PLAY

REGION 07 | THE LATE-GAME FACTION FRONT

Corrupted Lands

3,072 x 2,560 studs | 188% of Lindenmoor's area | separate teleport place

REGIONAL TERRAIN PALETTE Ash, charred earth, dead olive, corruption crimson

LAYOUT SCHEMATIC | NOT FINAL STUDIO COORDINATES public route quiet route

DESIGN DIRECTION

PLACE CHARACTER

The largest place is an inhabited late-game theater for PvP, faction pushes, and public events. Faction camps, survivors, and trade keep it alive between conflicts.

LANDMARKS

Two faction staging camps with supplies and medics, scavenger exchange, shattered town and salvage families, broken aqueduct, Eclipse Citadel event front, catacomb traverse, and buried dispatch.

MOVEMENT + COMBAT

Give event objectives clear approach and withdrawal routes. Broken walls, high ruins, aqueduct edges, and a concealed catacomb flank support pushes, counter-flanks, and regrouping without a single choke point.

LIVING WORLD + SYSTEMS

Faction logistics, medics, scavengers, salvage crews, and displaced households create reasons to move through the region. Evidence and rumors can tie outlying sites to the Citadel; event routes may rotate among approaches.

BLENDER INTENT

At 188% of Lindenmoor's area, reserve multiple subregions for events and exploration. Use ash and charred ground, dead olive remnants, muted water, and controlled crimson corruption accents.
